

NSK

NSKHPS SPHERICAL ROLLER BEARINGS

THE STANDARD IN HIGH PERFORMANCE

STAY IN MOTION. STAY IN CONTROL.

FIELD-PROVEN TO OUTPERFORM AND OUTLAST: NSKHPS

Extreme heavy and impact loads in steelmaking, mining and construction. Extreme speeds and high heat in papermaking. Extreme reliability where and when unexpected machine and equipment downtime is intolerable.

For the spherical roller bearings employed in industry's most challenging applications, the expectations are invariably demanding: to run harder, to run faster, to run longer. And to transcend being mere load bearing components to being performance enhancers - mitigating maintenance and operating costs, improving throughput and profitability.

Decisively.

That measure of differentiation is achieved by better manufacturing processes, better material technology, better design fundamentals.

That differentiation is NSKHPS Spherical Roller Bearings.

**PERFORMANCE YOU CAN
COUNT ON.**

NSKHPS Spherical Roller Bearings are the synthesis of NSK technologies, with material engineering, tribology, mechanical design and advanced manufacturing engaged and applied. The outcome is a spherical roller bearing engineered to significantly outperform and outlast conventional iterations, meeting industry's ever-increasing challenges with significant and proven advantages:

- › Dramatically longer and reliable operating life
- › Higher dynamic load-carrying capacity
- › Higher limiting speeds
- › High temperature dimensional stability
- › Downsizing potential with no machine capacity loss

DESIGN FEATURES

NSKHPS Spherical Roller Bearings are optimized by design to deliver higher load carrying capacity, operate with higher limiting speeds, and perform reliably for a longer operating life. In conventional applications, their high performance capacity can also enable downsizing the design envelope for machinery and equipment.

DESIGN FEATURES

- › Manufactured with high purity steel for superior fatigue strength
- › Optimized, high capacity internal design
- › With wear-resistant surface hardened pressed steel and heavy-duty machined brass cages
- › Advanced raceway surface finishing for durability and wear resistance
- › High temperature dimensional stability: up to 200° C
- › Radial internal clearances C2, C-normal, C3, C4 and C5
- › Dimensional series 213, 222, 223, 230, 231, 232, 239, 240 and 241
- › For shaft diameters from 40 to 420 mm

PRESSED STEEL CAGE

- › High-strength cage with special nitriding surface treatment for superior wear resistance enabling higher operating speeds
- › Roller guidance is delivered by the central cage flanges, eliminating the need for a guide ring allowing for larger rollers, higher load capacity and longer life

MACHINED BRASS CAGE

- › Heavy duty cage design for superior performance in applications subject to heavy and/or impact loading
- › Cage pocket geometry and finger length provide superior roller guidance and controlled roller skew
- › Precision-machined contours optimize lubricant flow to rolling contact surfaces

ADVANCED RACEWAY SURFACE FINISH

With NSKHPS spherical roller bearings, superior ring grinding technology in conjunction with optimized roller-to-raceway profiles control roller motion within the bearing, reducing bearing wear and improving bearing fatigue life.

Additionally, NSK applies a super-finish process to raceway surfaces to remove remaining material asperity peaks - at a micro level - to improve lubrication performance and augment wear resistance.

DESIGNATION SYSTEM

NSKHPS SPHERICAL ROLLER BEARINGS

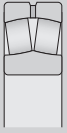

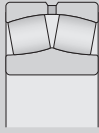

DESIGNATION	ATTRIBUTE	
Dimensional Series	213	extra heavy duty type
	222	medium duty type
	223	heavy duty type
	230	very light duty type
	231	light duty type
	232	medium duty type, wide
	239	extra-light duty type
	240	very light duty type, wide
	241	light duty type, wide
Bore Reference Number		multiply x 5 for bore diameter in mm; 500 mm and greater expressed with a "/" eg. /500 = 500 mm
Internal Design	EA	high capacity design, steel cage
	CA	high capacity design, brass cage
Cage Type	blank	pressed steel cage
	M	machined brass cage
Bore Type	blank	cylindrical bore
	K	1:12 tapered bore
	K30	1:30 tapered bore
Lubrication Features	E4	lubrication groove and holes in the outer ring
	E7	lubrication groove and holes in the inner and outer ring

DESIGNATION	ATTRIBUTE	
Radial Internal Clearance	C2	less than normal clearance
	blank	normal clearance (CN)
	C3	greater than normal clearance
	C4	greater than C3
	C5	greater than C4
Stability Specification	S11	dimensionally stabilized up to 200°C, normally omitted from aftermarket part number
NSKHPS Symbol	*H*	dimensionally stabilized up to 200°C, normally omitted from aftermarket part number
Additional Features	W31	special inspection measure of superior raceway finish + upgraded packaging
	W507	W31 + E4 + S11 (with E4 and S11 omitted from the part number)
	W509	W31 + E7 + S11 (with E7 and S11 omitted from the part number)
